PROFESSIONAL SUMMARY

Environmental Studies graduate (UCSB, June 2026) who moved from lab-based groundwater research into full CEQA/NEPA-compliant EIR authorship, while also running day-to-day operations and HR for a university IT help desk team. Hands-on experience spans environmental impact review, GIS-based hydrogeologic mapping, aquatic fieldwork, and translating complex technical data for both expert and general audiences.

CORE COMPETENCIES

CEQA / NEPA

EIR / EIS Authorship

ArcGIS Pro

R (Applied Statistics)

Water Resources / Hydrogeology

SGMA / DWR Regulatory Frameworks

Technical Report Writing

Operations & Team Coordination

EDUCATION

Bachelor of Science, Environmental Studies

University of California, Santa Barbara

Cumulative GPA: 3.79 · 30 credit hours of graduate-level Environmental Science & Management coursework · Emphasis on Wildlife, Ecosystems, and Habitat Management

- Authored a 58-page focused Environmental Impact Report (EIR), CEQA/NEPA-compliant, covering biological resources within an Environmentally Sensitive Habitat Area (ESHA); developed 4 project alternatives and responded to simulated public comments
- Critiqued the Air Quality section of a professional EIR for a mixed-use residential project in the City of Goleta
- Built water budgets for California alluvial basins and mapped watersheds in ArcGIS; analyzed SGMA/DWR groundwater regulatory frameworks and PFAS/nitrate contamination case studies
- Applied environmental statistics in R to real ecological datasets (grassland restoration, red abalone growth)
- Examined the global water cycle and water scarcity issues using the Thornthwaite water balance model and flood frequency analysis

June 2026

Study Abroad Participant

University of Bologna

Aug 2024 -- Dec 2024

WORK EXPERIENCE

Waves Laboratory, Bren School of Environmental Science and Management

Intern

- Supported digitization of 74,557 previously unprocessed USGS pages containing water resource data
- Designed project workflow and conducted literature reviews to guide the digitization initiative
- Conducted manual quality assurance and control, serving as the human component to verify Large Language Model accuracy in extracting quantitative data from technical tables
- Drafted and edited technical manuscript sections, translating complex scientific data into clear, accessible summaries for both technical and lay audiences; future co-author of resulting publication

April 2024 -- August 2025

Jasechko Laboratory, Bren School of Environmental Science and Management

EUREKA Intern

- Analyzed 210,278 groundwater well measurements to estimate the geographic extent and subsurface depth units within the previously unmapped Dakota Aquifer system
- Retrieved, processed, and analyzed borehole datasets from the USGS Publications Warehouse to develop 3D hydrogeologic aquifer maps in ArcGIS Pro and RStudio
- Presented research findings through written reports, posters, and presentations, translating complex environmental data into comprehensible findings for both technical and non-technical audiences

June 2023 -- August 2023

Samuel Lawrence Foundation

May 2026 -- Present

Social Media Intern

- Assist foundation in outreach efforts through preparing social media content that is impactful to the general public
- Raise awareness about nuclear hazards related to the San Onofre Nuclear power plant

UCSB Information Technology Services Student Help Desk

April 2024 -- June 2026

Operations Coordinator, HR Team Lead

- Manage 60-100 ServiceNow tickets weekly, coordinating across departments and troubleshooting student and staff issues under tight deadlines
- Produce clear documentation, workflows, and process guides using Excel, Word, and PowerPoint
- Lead HR operations including hiring, onboarding, training, and performance benchmarking for the student staff team

Cheadle Center for Biodiversity & Ecological Restoration, Aquatic Invertebrate Lab

January 2024 -- June 2024

Intern

- Conducted fieldwork and collected aquatic samples in wetland ecosystems at UCSB's North Campus Open Space
- Sorted and identified aquatic macroinvertebrates using a dissecting microscope and dichotomous key

Surfrider Foundation

January 2025 -- Present

Community Member

- Participate in coastal stewardship, public outreach, and environmental advocacy efforts

CEES Mentor Collective

September 2024 -- June 2025

Mentor

- Guided 3 Environmental Studies students on academic and career development, strengthening communication and interpersonal skills

SKILLS

Environmental Review: CEQA, NEPA, EIR/EIS preparation, mitigation monitoring

GIS & Data Tools: ArcGIS Pro, RStudio/R, Excel, Word, PowerPoint, ServiceNow

Field & Lab: Biological fieldwork, aquatic macroinvertebrate identification, borehole/groundwater data analysis

Research & Writing: Technical manuscript drafting, literature review, translating technical findings for lay audiences

Languages: Portuguese (Native), Spanish (Intermediate)
